GOLDRAGON AND EARN EPIC
REWARDS**

THE LORE

ONCE UPON A TIME ...

RACONTEUR

There was a small village nestled deep in a lush valley. This village was unlike any other, as it was home to a majestic dragon who watched over the Citizens and protected them from harm.

The dragon had a unique power- it could emit gold from its mouth whenever it was fed with delicious and nutritious food.

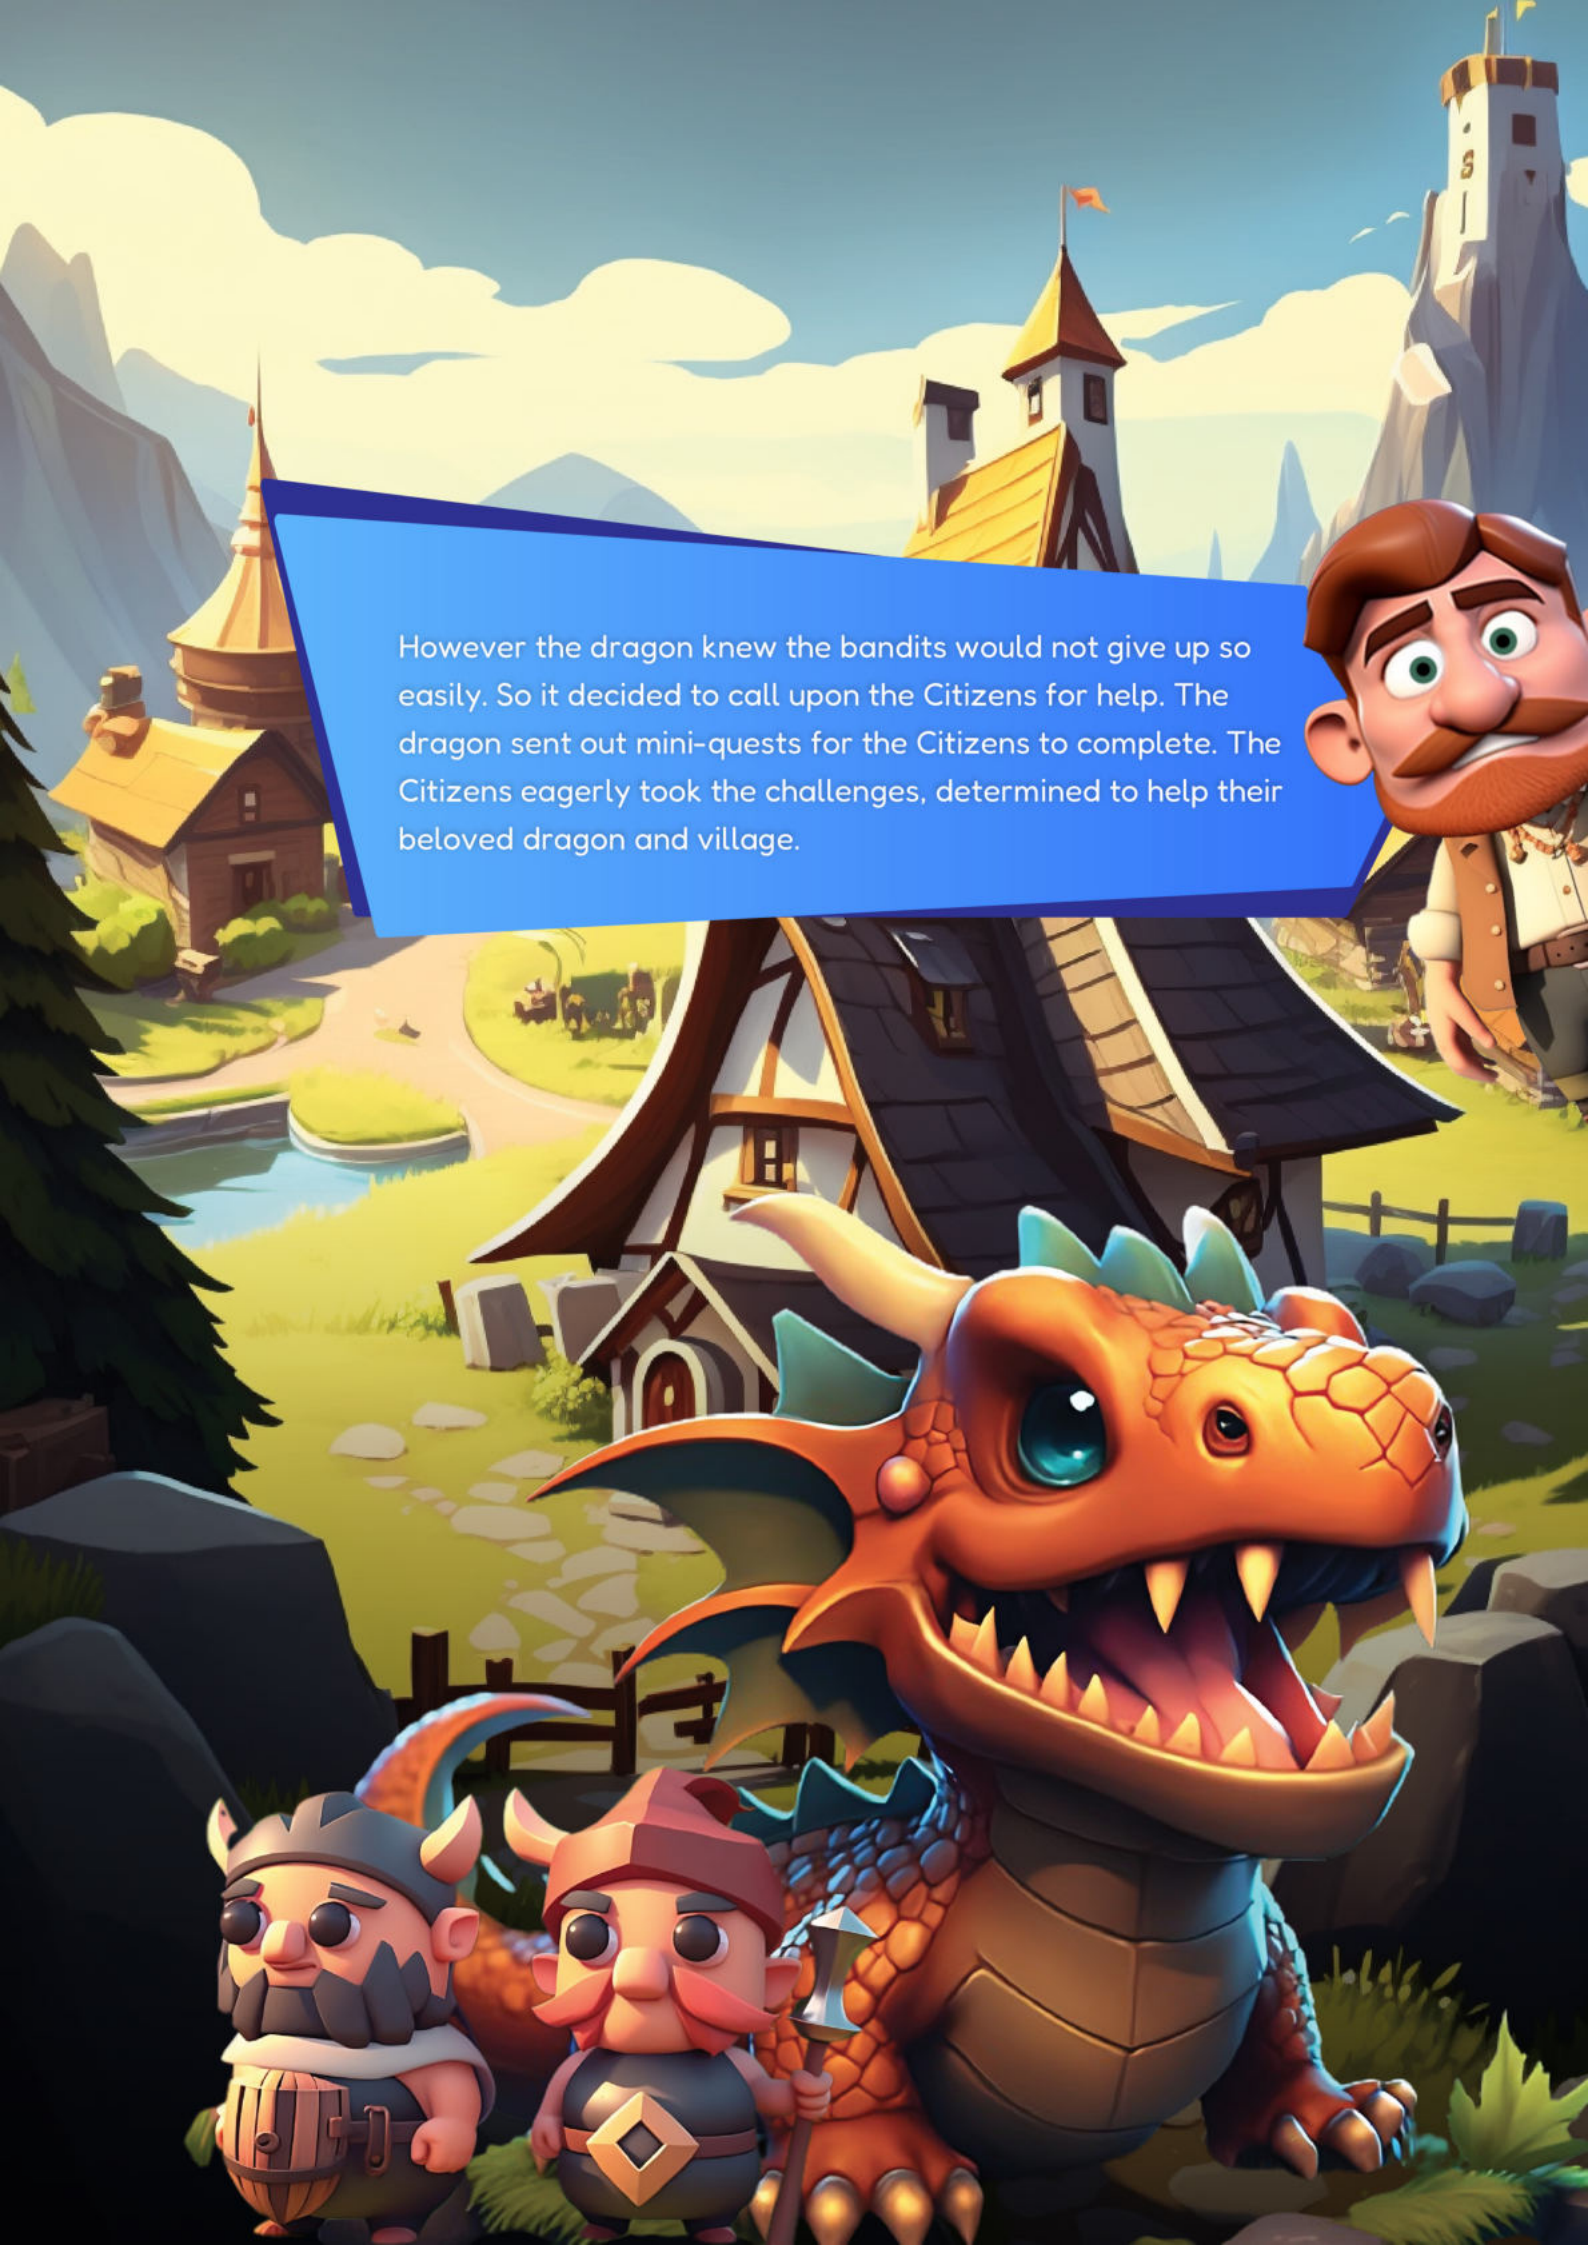

In return for this magical power, the kings and Citizens had to regularly provide the dragon with food, which is enjoyed immensely.

One day, a group of bandits came to the village and threatened to raid it. As the bandits approached the village, the dragon could sense the danger and immediately took to the skies.

The Citizens were afraid, but they knew they could trust the dragon to protect them. As the bandits approached, the dragon let out the fierce roar and breathed a stream of fire towards them, scaring them away.

However the dragon knew the bandits would not give up so easily. So it decided to call upon the Citizens for help. The dragon sent out mini-quests for the Citizens to complete. The Citizens eagerly took the challenges, determined to help their beloved dragon and village.

After the bandits were driven away, the dragon was pleased with the efforts of the Citizens and emitted more gold to those who had completed the mini quests. The Citizens were overjoyed at the reward and knew that their efforts had not gone unnoticed .

From that day on, the dragon knew it could count on the Citizens to help defend the village. And the Citizens knew that they could trust the dragon to protect them and bring them wealth. The bond between the dragon and the Citizens grew even stronger, it was a bond that could never be broken, a testament to the power of trust, respect and love!!

THE NFTS

The KING NFT is the most powerful and coveted NFT in the dragon village. Only one KING NFT can be applied in each game, and it is the owner of this NFT who rules the village.

Interested collectors and players eagerly await the scheduled launch date, where they will have the opportunity to bid for the KING NFT. The bidding process is highly competitive, as everyone wants to have the chance to rule over the prosperous and harmonious dragon village.

The bidding war is fierce, with the collectors from all over the world vying for the chance to become the ruler of the dragon village. But only one bidder will emerge victorious, becoming the new owner of the KING NFT and the ruler of the dragon village.

As the new ruler of the dragon village, the KING NFT owner will have the power to make decisions that will impact the village and its inhabitants. They will need to be wise and fair in their rule, taking care to protect the village and its bond with the dragon.

KING NFT

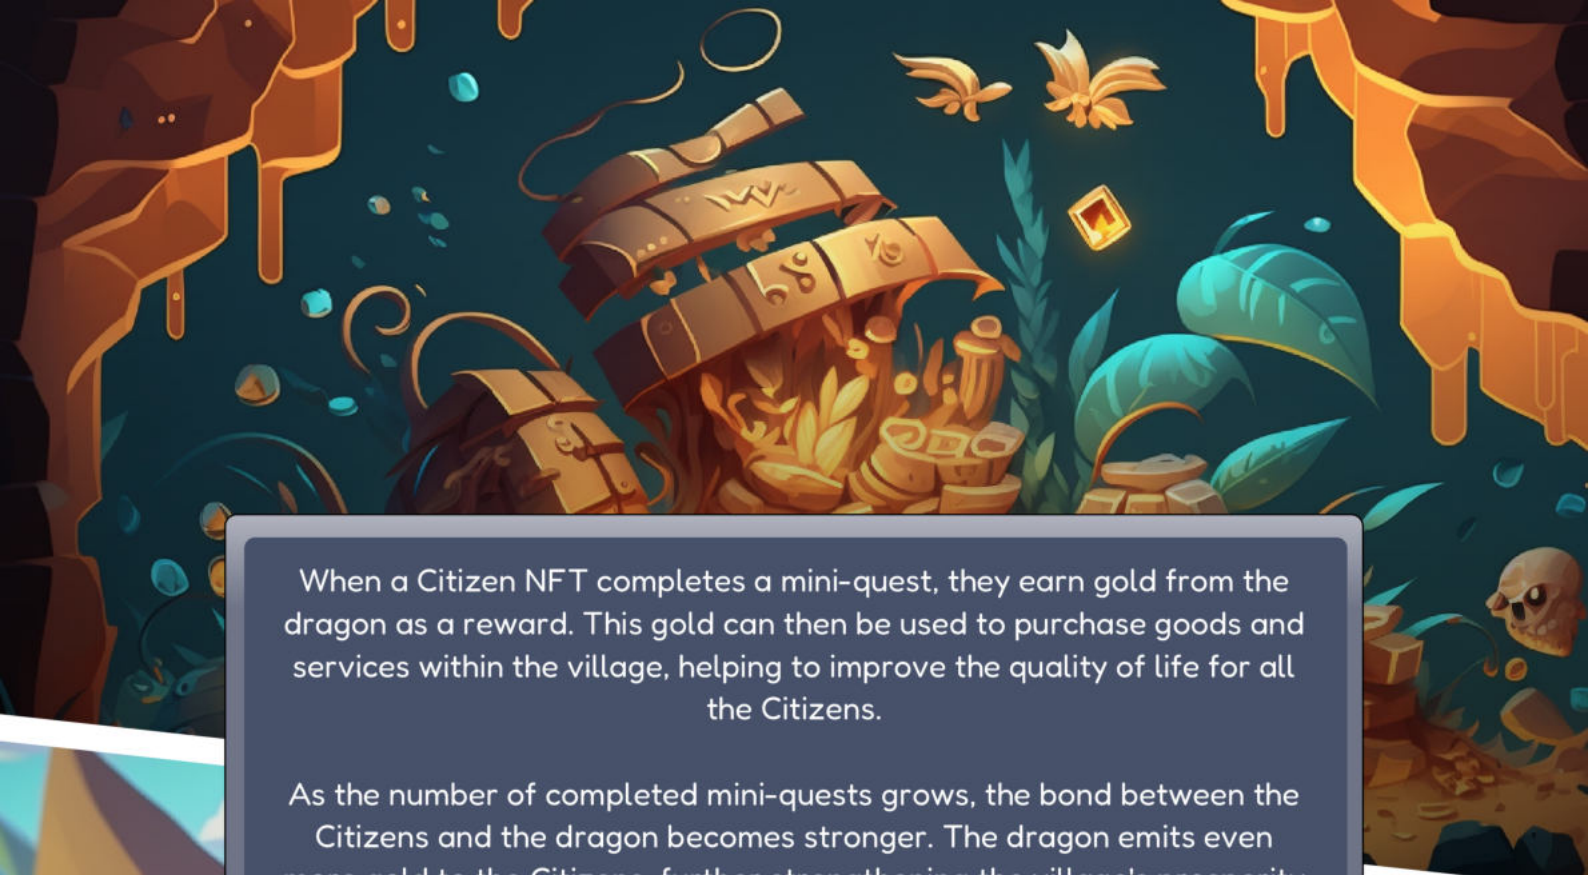

The KING NFT owner will also have the responsibility of maintaining the harmony and prosperity of the dragon village, making sure the Citizens are happy and well-cared for, and the bond with the dragon remains strong. It is a great honour to be the ruler of the dragon village, and the KING NFT owner must work hard to live up to the expectations of the Citizens and the dragon alike.

In the dragon village, the Citizen NFTs play an important role in the day-to-day activities of the village. Each Citizen NFT represents a member of the village community, and they work hard to ensure the prosperity and well-being of the village.

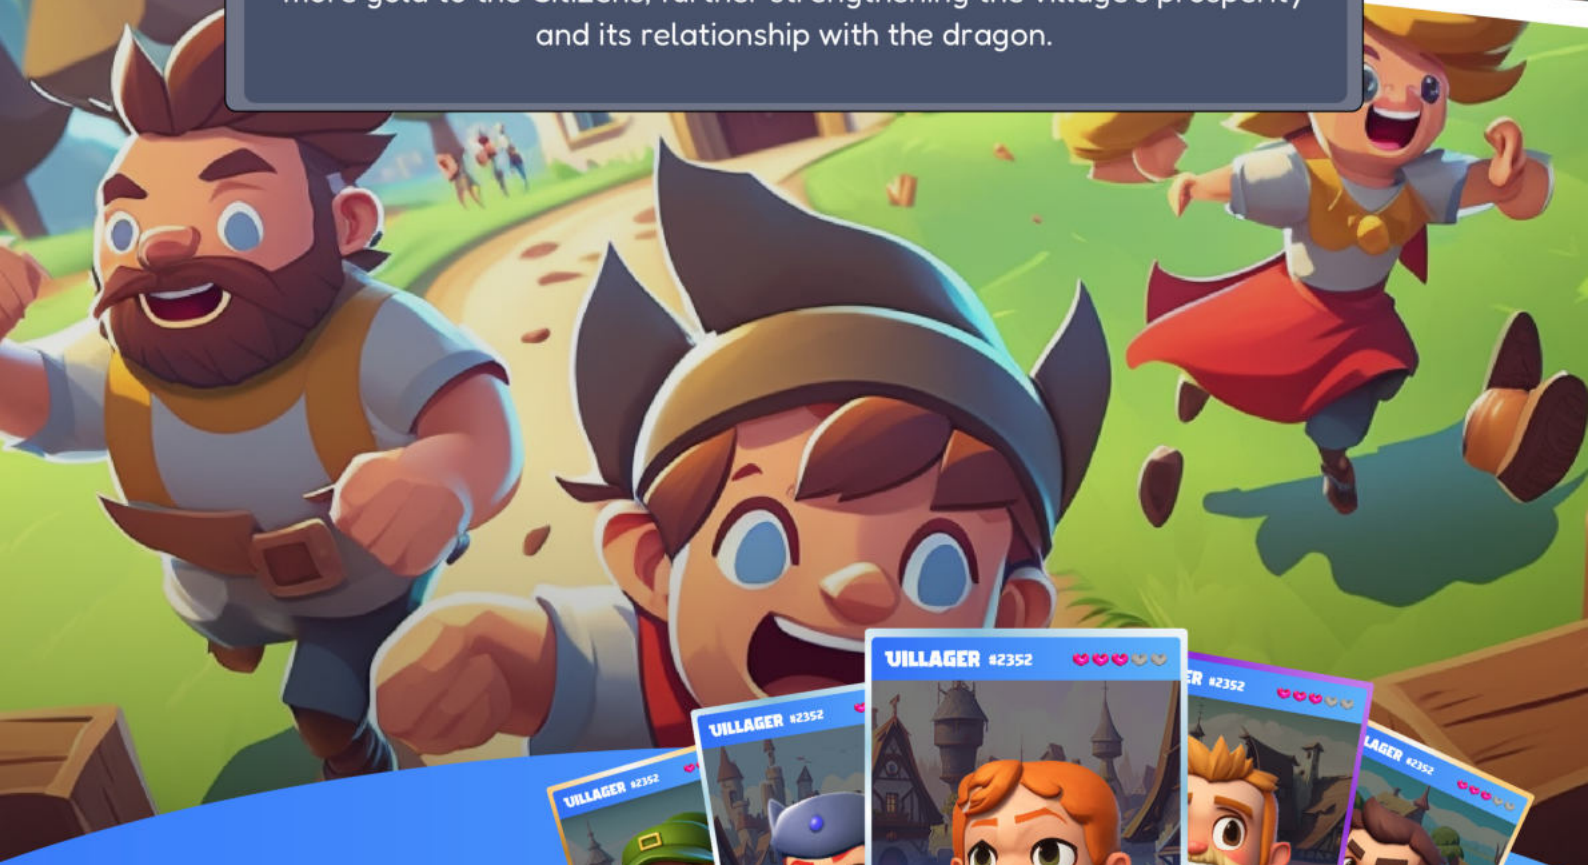

One way that Citizen NFTs can earn gold in the game is by participating in mini-quests. These mini-quests are small tasks that help to improve the village and strengthen its bond with the dragon. For example, a mini-quest could be to gather supplies for the dragon or to build a new structure in the village.

When a Citizen NFT completes a mini-quest, they earn gold from the dragon as a reward. This gold can then be used to purchase goods and services within the village, helping to improve the quality of life for all the Citizens.

As the number of completed mini-quests grows, the bond between the Citizens and the dragon becomes stronger. The dragon emits even more gold to the Citizens, further strengthening the village's prosperity and its relationship with the dragon.

CITIZENS NFT

In this way, the Citizen NFTs play a crucial role in the success of the dragon village. Through their hard work and dedication, they help to ensure the continued harmony and prosperity of the village and its inhabitants.

In the Goldragon game, the Food NFTs are an essential item that the Citizens use to feed the dragon. These Food NFTs represent different types of food that the Citizens can use to keep the dragon well-fed and happy.

The Citizens can acquire Food NFTs in various ways, such as completing mini-quests or trading with other Citizens. Once they have Food NFTs in their possession, they can use them to feed the dragon and earn gold in return.

Feeding the dragon is not only important for the well-being of the dragon but also for the prosperity of the entire village. When the dragon is well-fed, it emits more gold, which the Citizens can use to improve the village and make it a better place to live.

As the village grows and more Citizens join the community, the demand for Food NFTs increases. This creates a thriving economy within the game, where Citizens can trade Food NFTs and other items to build wealth and improve their standing within the village.

CITIZENS NFT

In summary, Food NFTs play a critical role in the Goldragon game by enabling Citizens to feed the dragon and earn gold. They also help to create a thriving in-game economy that supports the growth and prosperity of the entire dragon village.

MINI QUEST

In Goldragon, Mini Quests are small games or challenges that Citizens can participate in to earn rewards.

These mini-games can vary in difficulty and duration, and they are designed to be fun and engaging for players.

The rewards for completing Mini Quests can include gold, Food NFTs, or other valuable items that can be used to improve the village or traded with other players. By participating in these quests, Citizens can earn valuable resources and build their standing within the community.

Additionally, Mini Quests provide an opportunity for players to showcase their skills and compete against each other. This can create a sense of friendly competition and community within the game, as players work together to complete quests and earn rewards.

Overall, Mini Quests are an important aspect of the Goldragon game, providing players with a fun and rewarding experience while also contributing to the growth and prosperity of the dragon village.

THE PLAY-TO-EARN MECHANICS

DRAGON HOARD

The Dragon Hoard begins when a player wins the bid to become a King. The winning bid will be the first pool of funds to start the Dragon Hoard. The weekly King returns, player returns and referrals will be paid from the Hoard in Diamonds.

PLAYERS

Players can take up the King role or Citizens role.

THE KING

There will only be one King per Hoard. When a new Hoard is initiated, players can bid for the opportunity to become the King. The highest bidder will win the King NFT and the Hoard will begin with the winning bid amount.

For the king,

5% of the Hoard

will be paid weekly to the King. The returns will be made in Diamonds which is pegged to 1 Diamond = 1 USD.

1 DIAMOND  **= 1 USD**

THE VILLAGER

By depositing into the Dragon's Hoard, each player will receive a Citizen NFT.

Each deposit requires a minimum of USD100 and a maximum of 10% of the Hoard size at the time of deposit.

Citizens will receive a percentage of their deposit amount weekly until **150%** is reached or the Hoard dissolves. The returns will be made in Diamonds which is pegged to 1 Diamond = 1 USD.

THE CITIZENS NFT

EACH CITIZEN NFT VARIES IN THE FOLLOWING:

The Mini-Games that
can be unlocked

Number of lives (real
plays) per week

Automatic additional
score for each real play

FOR EACH CITIZEN NFT, THE PLAYER

**WILL RECEIVE
UP TO 12.5%
OF THE DEPOSIT AMOUNT
WEEKLY UNTIL
150%
IS MET**

**CAN PLAY THE ELIGIBLE
MINI-GAMES TO EARN FOOD
ITEMS USING LIVES**

**CAN FEED THE DRAGON WITH
THE FOOD ITEMS TO GET
ADDITIONAL PERCENTAGE
WEEKLY**

ROADMAP

STAGE 1:

- ★ Launch of Goldragon NFT GameFi, featuring Kings NFT, Citizen NFT, and Food NFT
- ★ Release of the game token, which can be used to play the game and purchase NFTs
- ★ Integration with popular blockchain networks such as Ethereum and Binance Smart Chain
- ★ Onboarding of early adopters and building a community of gamers and NFT collectors

STAGE 2:

- ★ Introduction of Goldragon Scholarship, which offers play-to-earn profit sharing with NFT holders
- ★ The scholarship will allow players to earn additional rewards by playing the game and contributing to the growth of the community
- ★ Launch of new mini-quests and game modes to keep players engaged and excited
- ★ Further expansion of the community through marketing and promotional campaigns

STAGE 3:

- ★ Development of an internal exchange for NFTs and game tokens, allowing users to trade and swap their assets
- ★ Introduction of new features such as staking and liquidity pools, which will provide additional earning opportunities for the community
- ★ Integration with other blockchain networks to reach a wider audience

Game token initially set @ 0.025 usd per token. revise every 10% distributed out, means when pool liquidise, citizen lost 500 usd, means he get 20,000 token.

- ★ When play in game, we set the token for game from 1X 5000, means when game total pool price is 1000 usd, the game token to play is 0.20 usd.

STAGE 4:

- ★ As the number of participants continues to grow, listing the game token on major cryptocurrency exchanges such as Binance and Huobi
- ★ The listing will bring greater liquidity and visibility to the project, and help to attract more users and investors
- ★ Expansion of the team and development of new partnerships to further accelerate growth

STAGE 5:

- ★ Venturing into diversification project development, such as metaverse, renewable energy, and other innovative projects
- ★ Building on the success of Goldragon NFT GameFi, the team will explore new opportunities to leverage blockchain technology and gaming to create value for users and drive positive change in the world.

FUTURE DEVELOPEMENT

20%

10%
MANAGEMENT REWARD

STAGE 3

Internal exchange stage 3 , Internal exchange token starting price looking at 0.5-1cent ,USD 0.005-0.01\$

0.5 cent - 1 cent. usd 0.005-0.01\$

STAGE 4

STAGE 5

Stage 5, project development allocation 20% = 200 mil token, project allocation we target at USD 50mil , which equal to token Price of 25 cents per token. \$0.25

25 cents per token. 025\$

For example holder hold 100000 tokens at 0.01\$ When token archived 0.25\$, holder net worth would be, \$25,000. Cost from game or 1000 usd EG :1,000,000 tokens, Cost @0.01, \$10,000 , profit@ 0.25, = \$250,000. ICO/ITO targeted year 2026

2026

Participants numbers is important in order to create the demand of the tokens. Demand is going proportional with with the size of the goldragon pool, as pool getting Bigger, the weekly price become higher and more and more ppl will buy the token and Earn the prize.
